

# Busy Caring for Patients? Let Us Take Care of Your Documents.

Panasonic document scanners have the speed and accuracy that healthcare offices demand.

## Panasonic Workgroup Scanners Healthcare Document Solutions

### Be More Productive While Going Green

Does it seem like the amount of personal information that you handle, such as insurance cards, driver's licenses, ID cards and medical records, increases daily? Panasonic scanners will quickly turn these documents into data and automatically organize them for you. Converting information into data saves the hassle of searching through paper documents, and makes it easy to share information via computers and e-mail. Reducing the number of paper documents also cuts storage space needs and saves natural resources. Let a Panasonic document scanner lighten your workload and help the environment.

### Space-Saving Installation

The scanner's compact design lets you place it right in the reception area or on a desktop. That means you can put it right where you want to use it.

### Intelligent and Efficient Scanning

The scanner automatically detects which way the document is facing and corrects it after scanning. It can also automatically divide a document in half for scanning, to reduce time and work in image processing. It comes with software that simplifies complicated scanning processes, and greatly helps routine office chores like filing.

# Enjoy a New Level of Work Efficiency

Panasonic offers reliable, flexible healthcare solutions.

## Compatible with Various Documents and Sizes

Panasonic document scanners can handle a variety of document types all together, such as cards with irregular surfaces and paper ranging from thin to thick sheets. Driver's licenses, health insurance cards, ID cards and medical records can be scanned one after the other, greatly improving work efficiency. The scanner can also scan data from documents up to 100 inches in length, so you can scan long documents like electrocardiograms. The optional flatbed scanner will scan files and books directly.

You can scan cards and paper sheets one after the other.

You can also scan electrocardiograms. (The photo shows the KV-S1045C.)

Flatbed scanning (optional).

## Versatile and Easy to Install and Use

The compact design makes the scanner easy to clean and maintain in any office. And when the long-life rollers need to be replaced, they can be exchanged in seconds. It even has a replaceable lens cover to minimize potential service costs.

Install in reception areas and other small spaces.

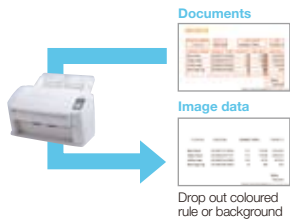

Roller replacement is fast and easy.

## Intelligent Image Processing

Panasonic document scanners automatically adjust their density to produce scanned data with accurate text even from documents such as forms and vouchers that have coloured or dense backgrounds, which are difficult to read with an OCR. They are also equipped with versatile image processing functions like data generation for automatic image orientation, automatic cropping, skew correction, and punch-hole deletion.

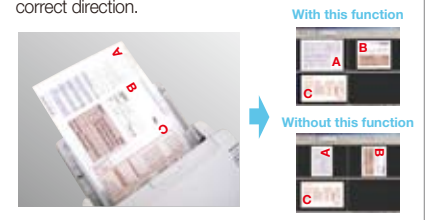

### Multi Colour Dropout

Any of up to three specific colour ranges on the document can be selected as a dropout colour.

### Automatic Image Orientation

Even when documents are set in different directions, this function detects the direction of the scanned text and automatically rotates the document into the correct direction.

Panasonic offers a complete suite of communications, office productivity and networking solutions.

Network Camera

Business Telephone System

IP Conferencing Phone

High-Speed Scanner
