

Need a Star Performer? Let Panasonic Manage Your Document Needs.

Panasonic document scanners have the speed and accuracy that real estate agencies demand.

Panasonic Flatbed Scanner Real Estate Document Solutions

Be More Productive While Going Green

Does it seem like the amount of information you handle, such as application forms, certificates and floor plans, just keeps growing? Panasonic scanners will quickly turn these documents into data and automatically organize them for you. Converting information into data saves the hassle of searching through paper documents, and makes it easy to share information via computers and e-mail. Reducing the number of paper documents also cuts storage space needs and saves natural resources. Let a Panasonic document scanner lighten your workload and help the environment.

Versatile 2-Way Scanning

Panasonic combines a flatbed mechanism for scanning things like brochures and floor plans with an ADF (Automatic Document Feeder) for scanning a large number of documents in a single run for exceptional convenience and versatility.

Intelligent and Efficient Scanning

The scanner automatically detects which way the document is facing and corrects it after scanning. It can also automatically divide a document in half for scanning, to reduce time and work in image processing. It comes with software that simplifies complicated scanning processes, and greatly helps routine office chores like filing.

Panasonic ideas for life

Enjoy a New Level of Work Efficiency

Panasonic offers reliable, flexible real estate solutions.

Versatile and Easy to Install and Use

You can install this compact scanner right next to your desk, so you won't have to move every time you want to scan something – a great time saver when you're busy. By scanning and saving data, you can cut down on the space you need for storing documents, and make it easier to find them when you need them. You can also boost your sales efforts by quickly scanning floor plans and neighborhood maps and e-mailing them to your customers.

Compatible with Various Documents and Sizes

The Panasonic document scanner features both a flatbed mechanism for scanning things like blueprints and maps, and an ADF for scanning a large number of documents. The ADF also lets you scan various paper sizes one after the other, for greater work efficiency.

You can scan mixed documents one after the other.

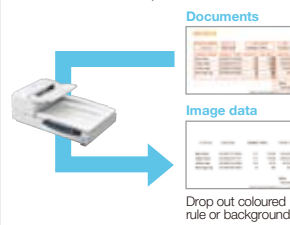

You can scan brochures containing blueprints and maps.

Intelligent Image Processing

Panasonic document scanners automatically adjust their density to produce scanned data with accurate text even from documents such as forms and vouchers that have coloured or dense backgrounds, which are difficult to read with an OCR. They are also equipped with versatile image processing functions like data generation for automatic image orientation, automatic cropping, skew correction, and punch-hole deletion.

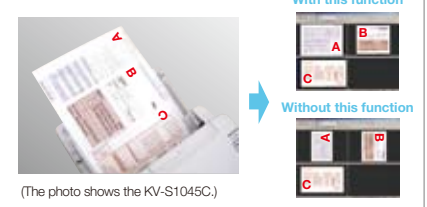

Multi Colour Dropout

Any of up to three specific colour ranges on the document can be selected as a dropout colour.

Automatic Image Orientation

Even when documents are set in different directions, this function detects the direction of the scanned text and automatically rotates the document into the correct direction.

Panasonic offers a complete suite of communications, office productivity and networking solutions.
